## Products

Ohio Valley Metal Roofing is equipped with 2 roll formers and the capabilities to cut customers' metal panels for roofing and siding to exact lengths. In addition to the 19 color choices in stock and several profile options, it's possible to create the look anyone will want for their home, building, or business.

The steel coils used to produce our quality products are painted in an Ohio Valley coating facility using Valspar's Weather XL coating. Valspar offers the best paint finish in the industry with their 40 year warranty. The unpainted, bare galvalume steel panel is covered with a 20 year warranty.

## Crown-Loc Panel
